Dear Sir/Madam

Kalzip are pleased to confirm that the above company are recognised as a competent aluminium welding organisation with the necessary expertise and experience to undertake all welding operations and soaker installations to Kalzip standing seam roof systems.

Whilst it is not Kalzip policy to approve subcontractors, if requested to recommend a welding subcontractor, Sureweld would be a company that we would be confident in recommending.

During the last 10 years Sureweld have undertaken numerous welding operations on a large number of Kalzip contracts including some of our most prestigious projects.

Kalzip also regularly employ Sureweld direct both at Haydock and on site to support our fabrications department during periods of high demand and to overcome complex geometries and detailing.

We trust this is satisfactory to requirements and look forward to assisting you again in the near future, if in the meantime there is any further information you require please do not hesitate to contact me at our Haydock offices.

Yours sincerely

Duncan Johnstone
Sales Director Kalzip UK
